

The First Air Purifier Scientifically Proven to Reduce COVID-19 on Surfaces

ActivePure Technology is the only air sanitizer technology scientifically proven to reduce the SARS-CoV-2 novel coronavirus on surfaces.

- ActivePure Technology was tested on live SARS-CoV-2 virus, not proxy or surrogate strains
- Demonstrated a 99.98% surface kill rate of SARS-CoV-2 virus within 7 hours
- Test completed in an independent FDA-compliant lab

The ActivePure Technology disinfection system is the safest, fastest and most powerful surface and air-purification technology available that minimizes recontamination and cross contamination in real time without the use of chemicals or ozone.

ActivePure Technology Testing

Testing done at MRIGlobal, an independent, FDA-compliant laboratory.

% Reductions measured incrementally over natural degradation of SARS-CoV-2.

Outside of control group - over 99.9% reduction of SARS-CoV-2.

Average Percent SARS-CoV-2 Reduction on Surfaces

How Does it Work?

Units with ActivePure Technology pull free oxygen and water molecules in the air through ActivePure's patented honeycomb matrix. The technology creates powerful oxidizers, known as ActivePure Molecules, that are then released back into the room, where they seek and destroy DNA and RNA viruses including SARS-CoV-2 (novel coronavirus), Swine Flu (H1N1), Avian Bird Flu (H5N8), Hepatitis A (HAV) and MS2 bacteriophage, regardless of their size, on surfaces and in the air.

Safe. Proven. Effective. Certified.

Products with ActivePure Technology have provided healthy indoor environments for 50 million businesses and residences worldwide, including:

- Office Buildings
- Schools
- Restaurants
- Hotels
- Retail Businesses
- Government Buildings
- Indoor Event/Entertainment Spaces
- Professional Sports Locker Rooms
